BizFlow Overview

Overview

BizFlow M provides a powerful Low-Code, No-Code application platform to initiate, manage and automate tasks, reports, and processes all in a single workplace. BizFlow M helps citizen developers create robust process models to manage complicated business processes, monitor the flow of work, and complete work assignments while also collaborating with others throughengagement features such as comments, correspondence, and chat.

BizFlow M also provides real-time monitoring of work in progress, archived work, attachments, comments, audit, and history information to facilitate day-to-day operations.

Core Use Cases

- **Government**: Self-Service Web Portals, Grants Management, Procurement Process, Asset Tracking
- **Human Resources**: HR Case Management, Employee Onboarding, Background Investigation, Training, Performance Reviews
- **Healthcare**: EHR UI Modernization, Appointment Scheduling, Claims and Appeals Management
- **Finance**: Pension Administration, Purchase Requests/Approvals, Loan Processing, SOX Compliance
- **Real Estate**: Realty Management, Lease Administration
- **Manufacturing**: Change Request Management, New Product Introduction

Differentiators

BizFlow offers a lower total cost of ownership for delivering mission critical business solutions.

- **Architecture**: BizFlow M's low-code, no-code design allows for Citizen developers to advanced coders to create nimble and mission focused 508 compatible business solutions.
- **Implementation**: BizFlow M is designed for non-technical users to rapidly create and deploy repeatable human centered designed user experiences, resulting in increased adoption
- **UI/UX Development/Workflow**: BizFlow M provides a drag and drop designer that allows for rapid design of robust applications as well as a robust Business Process Management (BPM) workflow engine to power the flow of work across the organization.
- **Advanced Development**: BizFlow M supports API based integrations leveraging open-source libraries.

Past Performances

- 25 Years Providing Innovative Solutions Globally
- Business Process Management and Low-Code, No-Code Application Development
- Patented Data Centric Networked Application Development Service
- Patented ProcessAutomation Platform

What is BizFlow's ideal use case?

Form and Process Automation: taking complex forms & processes and removing all non-essential items, adding an automated workflow behind it.

How is BizFlow M Priced?

Concurrent or Named user licensing available on GSA MAS
