Company Introduction (English)	<p style="text-align: center;">YACHT, a RANDSTAD company</p> <p>YACHT leads the way in connecting professionals. We offer challenging projects and jobs with inspiring organizations such as Siemens, ASML and Philips and many more. For you, joining Yacht will be the start of building a large and powerful network. A network made up of professionals just like you with whom you can share knowledge and experiences.</p> <p style="text-align: center;">‘Together, we achieve more’ is our philosophy.</p> <p>Randstad is a global leader in recruitment and human resource solutions. Founded in the Netherlands in 1960, we are now active in over 40 countries and we employ more than 29,000 people. We provide employment opportunities for 576,000 people every day.</p> <p style="text-align: center;">REAL GROWTH</p> <p>We believe that real growth happens in the workplace. That’s why we focus on offering you the opportunity to become involved in interesting and challenging projects. You will become a member of the Yacht network. And of course you will constantly be working on new challenges, so that you will keep your knowledge and skills up-to-date.</p> <p style="text-align: center;">WHAT DRIVES YOU?</p> <p>Our understanding of what it takes to be professionally successful is second to none. And so we know how vital it is to look beyond basic skills requirements and educational background. We look at the person underneath. In practical terms, this means that before introducing you to one of our clients, we will take into account the factors that motivate you, your preferences with respect to an organization’s mission and culture, and – of course – your own personal circumstances and interests.</p> <p style="text-align: center;">AMBITIOUS PROFESSIONALS</p> <p>We are always looking for ambitious professionals. Professionals who are keen to acquire the skills that will make them stand out and be among the best in their profession. Professionals who actively seek out new challenges. Are you a highly skilled professional in the fields of engineering, finance or information technology? Would you like to broaden your horizons – both personally and professionally? Then we would like to meet you.</p>

Possible Job1	Electronics Designer (Junior/Medior/Senior) Working within Yacht means working on challenging designer projects at several big companies in the Eindhoven region. You will be working on project basis on design projects, varying from for example Electrical Layout, Power Electronics, Electrical Safety, Electronic cabinets, Motion Systems, highly complex PCB's (specifications, design and realization & qualification) and PLC engineering. While working on these project you are surrounded by a multidisciplinary team: Physics, Mechanics, Software and others. The projects vary every month and the specific role will be discussed during the intake and afterwards. Link to FULL vacancy text
Possible Job2	Mechanical Designer (Junior/Medior/Senior) – for (High Tech) Machinery We are looking for Mechanical Designers who are willing to pioneer, develop themselves and other colleagues around them. The Mechanical designer will contribute to the development of products; by specification, architecture, design, mechanical calculations (a.o. FEM), technical budget analysis, integration and test execution of mechanical components or subsystems. Working as a Mechanical designer at our clients is all about pushing the boundaries. This is not 'copy-and-paste' engineering. You need to be able to innovate. You will make use of everything you learned at university, and more, to create completely new solutions on time and within budget. You will work within multidisciplinary teams, and have plenty of opportunity to learn from highly skilled colleagues. They think ahead to achieve the seemingly impossible every day. Link to FULL vacancy text
Possible Job3	Computer Science / Embedded Software Designer / Integrator / Tester Are you a seasoned, talented and motivated embedded software engineer who wants to join an Agile group of and embedded developers? You will contribute to leading technologies for complex products or systems at high tech clients in the Brainport area in and around Eindhoven, The Netherlands. You will participate in challenging, innovative and multidisciplinary development projects. You will be working in a cross-functional team, using proven techniques for improving development, yet in a flexible manner, in order to ensure agility for the business to reach its shared goals.
